**CONSTRUCTION NOTICE (6/27/2013)**

**WATERMAIN REPLACEMENT AND TEMPORARY WATER SERVICE**

**LANGEVIN ST. & PLEASANT VIEW DR.**

Watermain replacement will begin in the coming weeks on the above mentioned streets. Shortly, the Spencer Water Department staff will be working in the area installing above ground temporary water pipes to supply homes with water during construction.

Once your home is connected to the temporary pipe, your water may become warm due to daytime temperatures. Simply run your water until it is cold, it will not affect your water bill while you are connected to the temporary pipe.

During construction your water may be shut down during the day without notice, however, we will try to notify you in advance when possible. When crews are digging near your driveway please remove vehicles from your driveway to a safe location or simply ask the crew members what is the best location, again we will try to notify you in advance.

Please be patient during construction as crews will be doing their best to complete the project in a safe and timely manner. The main replacement is necessary due to existing age, condition and/or capacity. This work is being performed in advance anticipated resurfacing of your street in a near future construction year. When completed, the newly installed watermain should also aid in increased fire flow to area hydrants.

Thank you in advance for your patience and understanding. Please contact our office at 508-885-7525 with any questions you may have.
